Program Management Improvement and Accountability Act (PMIAA) 2015
will improve United States **federal government project and program management** by:

- Creating a **formal job series and career path** for program and project managers
- Developing a **standards-based model** for program and project management
- Designating a **senior executive** responsible for project and program management policy and strategy
- Leveraging an **interagency council** on program management to share best practices

Project Management Institute (PMI.org) research:

- **64 %** of government strategic initiatives ever meet their goals and business intent
- Government entities **waste $101 M for every $1 B** spent on projects and programs
- The reforms outlined in the PMIAA align with PMI member input that indicates organizations who invest in program management talent and standards improve outcomes, accountability and efficiency

"The passage of PMIAA into law illustrates an acknowledgement of the value of project and program management by the United States government, and therefore lays an important groundwork as PMI continues to advocate for the profession in governments around the world."

Project Management Institute (PMI.org)

– **Largest, global, PM Certifying Body (for profit)**
– **Close to 500K Project Management Professionals (PMP) and growing**
– **Others are not-for-profit: IPMA, Australian (AIPM,) British Institute**

– **In the beginning,…**

Project Management Professional (PMP)®
If you're an experienced project manager responsible for all aspects of project delivery, leading and directing cross-functional teams, then the PMP® is the right choice for you.

…. then

Program Management
A program is a group of related projects managed in a coordinated manner to obtain benefits not available from managing them individually. Program management is the application of knowledge, skills, tools and techniques to meet program requirements. Organizations with mature program management are far more successful than those without it, according to our research.
